

**TITLE:** Processing module operating methods, processing modules, and communications systems

**Application Number** 200880113053 **Application Date** 2008.12.08

**Publication Number** 101855853A **Publication Date** 2010.10.06

**Priority Information**

**International Classification** H04K1/00

**Applicant(s) Name** Battelle Energy Alliance LLC

**Address**

**Inventor(s) Name** Mccown Steven H.;Derr Kurt W.;Moore Troy

**Patent Agency Code** 11006 **Patent Agent** xu jinguo zhong qiang

**Abstract**

A processing module operating method includes using a processing module physically connected to a wireless communications device, requesting that the wireless communications device retrieve encrypted code from a web site and receiving the encrypted code from the wireless communications device. The wireless communications device is unable to decrypt the encrypted code. The method further includes using the processing module, decrypting the encrypted code, executing the decrypted code, and preventing the wireless communications device from accessing the decrypted code. Another processing module operating method includes using a processing module physically connected to a host device, executing an application within the processing module, allowing the application to exchange user interaction data communicated using a user interface of the host device with the host device, and allowing the application to use the host device as a communications device for exchanging information with a remote device distinct from the host device.
